

SeaThrust™

Pressure Tolerant Rim Thruster

Kraken's rim driven thrusters are quiet, compact and light weight drives. They convert electric power directly into propulsion without transmission loss or gearbox noise.

- Rated to 6,000m
- Low noise and vibration emissions
- High dynamic performance
- Low propeller inertia
- High motor torque
- No central shaft reduces damage risk
- Eco-friendly – seawater lubricated
- Low maintenance
- High performance at low cost
