Forward Looking Statements

Some statements herein contain forward-looking information. The use of any of the words "anticipate," "believe," "continue," "could," "estimate," "expect," "intend," "may," "will," "plans," "project," "should," "target" and similar expressions are intended to identify forward-looking statements. These statements may include, but are not limited to, statements with respect to potential markets and contracts, the completion of a proposed transaction, sales and EBITDA projections or potential applications.

These statements address future events and conditions and, as such, involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the statements. Such factors and assumptions include, among others, the effects of general economic conditions, the ability to project future sales and margins from current fundamentals and assumptions about market share, changing foreign exchange rates and actions by government authorities or cross-border authorities with jurisdiction over waterways, and negotiations and misjudgments in the course of preparing forward-looking information. Kraken believes the expectations reflected in those statements are reasonable but no assurance can be given that these expectations will prove to be correct and such forward-looking statements included in, or incorporated by reference into, this presentation should not be unduly relied upon. These statements speak only as of the date of this presentation. In addition, there are known and unknown risk factors which could cause the Company's actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by the forward-looking statements.

Known risk factors include risks associated with the ability to close contracts, working capital risk to be able to build inventory, loss of key personnel, lack of patents protecting intellectual property, changes in competing technology, continuing shrinkage of military budgets or other target customer budgets, risks associated with publicly traded company obligations, inability to raise required capital, and other potential risks that arise in the normal course of business. Forward-looking statements are made based on management's beliefs, estimates and opinions on the date that statements are made and the Company undertakes no obligation to update forward-looking statements if these beliefs, estimates and opinions or other circumstances should change, except as required by law.
Reasons to Invest

- Leader in underwater robotics with leading-edge hardware and software to address military and commercial markets.
- Recent wins in the military market have validated the technology when put up against global defense companies.
- Commercial markets (oil & gas, offshore wind, pipeline inspection, fisheries) looking to use robotics and software to save money and keep people safe.
- Recently announced contracts include $30M contract with Belgian & Dutch navies; $20M Ocean Supercluster; $2M follow-on battery order; $2.9M KATFISH order.
- Experienced management team and high insider ownership of 27%. Strategic investor Ocean Infinity owns 15%.
- Product sales transitioning to recurring revenue (Robotics-as-a-Service and Data-as-a-Service)

2019 Sales and Activities to Date

Sept. 23, 2019  Awarded $2.9 Million KATFISH contract from ThayerMahan
Aug. 29, 2019  Awarded $2 Million deep sea battery contract
Aug. 13, 2019  ThunderFish® 300 vehicle delivered to Defense Research and Development Canada
Aug. 12, 2019  $0.5 million contract for SeaVision® sensors
Aug. 2, 2019    $1.8 million project funding to develop mooring chain laser inspection sensor
July 22, 2019   Conduct joint technology demonstrations with NOAA & ThayerMahan
June 28, 2019  Canada’s Ocean Supercluster commits funds to Kraken’s $20 million OceanVision Project
June 17, 2019  $0.9 million U.S. Navy Contract
June 13, 2019  $2.1 million KATFISH contract from ThayerMahan
Apr. 24, 2019  $0.6 million contract for subsea battery solution for military customer
Apr. 17, 2019  $1 million funding contribution to support initial phase of OceanVision™ project
Mar. 25, 2019  $1 million contract for ThunderFish® robot from Government of Canada
Mar. 22, 2019  Part of winning consortium for Belgium & Dutch Navy mine hunting program
Mar. 5, 2019   Receive $2.3 million from exercise of warrants by Ocean Infinity
Feb. 21, 2019  Ranked #1 Technology Company on 2019 TSX Venture Top 50 List
Feb. 19, 2019  $1.7 million of purchase orders from Ocean Infinity
Jan. 8, 2019   Awarded $0.5 million contract under Canada’s Defence Innovation Research Program
# Industry is Consolidating

Ocean Supercluster – RaaS Opportunity

- Private sector led partnership to boost innovation and modernization across ocean sectors. Major industry contributors: Irving (shipbuilding), PRNL (oil and gas), Emera (renewable energy), Cooke (aquaculture), Clearwater (fisheries), Canada Steam Lines (shipping)

- Key areas of interest relevant to Kraken: Unmanned vehicles, advanced sensors, digital twins, ship hull inspection, enhanced ocean networks, robotic surveys, robotic inspections, artic innovation

- $300 million pool of capital for projects over 5 years. Initial project awards expected in Q2, 2019

- Kraken is proposing OceanVision™ a $20 million project to map the sea floor in high definition for members across the stakeholder chain (science, defence, fisheries, offshore energy, etc.)

Supercluster Goals:
• Deploy innovative technology platforms across ocean sectors
• Strengthen links between ocean value chains and technology providers
• Fill capability gaps in the innovation ecosystem.
• Extend global reach and market opportunities.

Enabling Technologies:
• Sensors & imaging
• Robotics
• Autonomous systems
• Big data & analytics
• Subsea communications
• Biotechnology & genomics
• Remote systems & Satellite technology

Supplementary Slides
Serving the Maritime Robotics Market

- Kraken provides **underwater sensors**, **batteries**, and **robots** to military and commercial customers who use them to **Image** and **Map** the **Seafloor** and **Subsea Infrastructure** in **ultra high resolution**

- 7 year old company with 80 employees in Canada, US and Germany; **validated by leading Navies and Defense contractors** and exports to 10 countries.

- Our **proven technology** and **robust** products enable **complex missions** in all water depths and **challenging ocean conditions** (no GPS, limited comms, extreme pressure).

---

**AUV**
Autonomous Underwater Vehicle

**USV**
Unmanned Surface Vehicle

**TOWFISH**
Towed Underwater Vehicle

**ROV**
Remotely Operated Vehicle
US$5B Maritime Robotics Market – Key Drivers

**MILITARY**
- Mine Warfare - 500,000 underwater mines
- Anti-Submarine Warfare - 400 operational submarines
- Intelligence, Surveillance, Recon - Special forces, covert operations, environmental assessment
- Resurgence in underwater warfare and emergence of seabed warfare driving demand for unmanned systems for “dull, dirty, dangerous” missions.
- Unmanned Systems budget growing rapidly but still just 1.4% of US DOD F19 budget. F19 Budget for Unmanned Maritime Systems $1.3 billion.

**OIL & GAS & Other**
- >7,000 fixed platforms; >200 floating platforms
- >4,000 subsea wells; >650 offshore drilling rigs
- >200,000 km subsea pipelines
- >4,000 offshore wind turbines
- >600,000 subsea connectors
- Maintenance of existing infrastructure is a major driver for underwater sensors and robotics.
- Sensor data key for data analytics and digital twins
- Hydrography / seafloor mapping; Offshore Wind Farms
- Seafloor Mining; Treasure Hunting; Search and Recovery; Ocean Science; Fisheries Habitat Mapping
Synthetic Aperture Sonar Technology

Ultra High Image Resolution
- Constant along/across track resolution of 3cm x 3cm
- 15x better compared to Real Aperture Sonar

Increased Area Coverage Rate
- Up to 4 km²/h
- Up to 600m swath
- 10x better compared to Real Aperture Sonar

Operational Safety
- Ability to fly high off-bottom
- 10x UUV altitude (ie. 30m altitude = 300m range /600m swath)

Additional By-Products
- Real-time, co-registered high resolution 3D bathymetry
- Multi-aspect creates optical-like quality imagery
- Shadow enhancement improves target classification
- Enables Real Time ATR
- SAS micro-navigation output to INS increases accuracy

Image courtesy ECA Robotics
Synthetic Aperture Sonar Technology

Conventional Sonar vs Kraken’s Sonar – Towrope (50m range)

Real Aperture Sonar

Kraken AquaPix® SAS
Conventional Technology Does Not Compete

Conventional Side Scan Sonar
Pixel Resolution: 20cm @ 80m range

Kraken AquaPix® SAS
Pixel Resolution: 3cm @ 80m range
AquaPix® Product Line

- Modular SAS systems
- INSAS 1 and 2 for large platforms
- MINSAS 60, 120, 240
- Prices range from US$150K to US$500K+
- Have integrated with many AUV platforms
US Navy Foreign Comparative Test Award

US Navy has awarded Kraken a $900K FCT program to develop a Synthetic Aperture Sonar payload for man-portable AUVs.

Have completed successful demo of prototype to USN’s EOD teams. NRE underway.

Target to significantly reduce SWaP for deployment.
Underwater Platforms Overview
KATFISH™ & THUNDERFISH® PLATFORMS

Tethered System
300m depth rating

Untethered System
6,000m depth rating
KATFISH™ - Tethered Underwater Towfish

Key component in major foreign navy bids
Recent surveys performed under CRADA with US Navy and NOAA
Successful demonstrations at Advanced Naval Technology Expo (ANTX) in USA
Successful integration on Elbit’s Seagull USV
Now building KF4, KF5 and KF6
Sensors - World 1st: Full Colour 3D Underwater Laser

SEAVISION™ | 3D UNDERWATER IMAGING SYSTEM

- Ultra-high resolution
- Twin pods enable flexible mounting on ROVs and AUVs
- Dynamic (profiling) or static (scanning) operation
- Full colour point clouds from RGB lasers
- Unprecedented scan speed (300,000 points/second)
- High-sensitivity colour camera with live video streaming
- No wet moving parts
- Real-time signal and image processing
- Embedded inertial navigation system
- Simple in-field, on-deck calibration
- Compact and lightweight
  (42 cm length x 11.4 cm diameter, 6 kg)
- Low capital cost
SeaVision Inspections – Mooring Chain, Ship Hull, etc.

High Speed Synthetic Aperture Sonar for Underwater ISR

- Tightly Integrated System Solution
  SAS / Towbody / Intelligent Winch / LARS

- UHD Resolution At Long Range
  3x3 cm imagery, 6x6 cm bathymetry
  440 m swath with full resolution

- Exceptional Area Coverage Rate
  3km² @ 8 knots tow speed

- Rapid Deployment
  Complete system fits in 20' ISO container

- Superior Price / Performance Value
  Purchase or contract as a service
  COTS or MIL-STD certified

www.krakenrobotics.com
Tentacle® Winch & ALARS

- Designed and developed by Kraken’s Handling Systems Group in Nova Scotia
- Highly intelligent electric winch and ALARS which can adjust cable scope through active feedback from underwater towed platform
- Intelligently communicates with KATFISH for motion compensation and bottom avoidance
- Successful demonstrations at USN ANTX 2018 in U.S and CRADAs with NOAA and NUWC
- Handling Systems Group is former team from Rolls Royce Marine
Management & Technical Team Depth

Karl Kenny, President & CEO
• Ex-Canadian Navy maritime surface officer and Microsoft employee pre-public company
• 20 year history in imaging technologies having founded 3 companies

Greg Reid, Chief Operating Officer
• 20+ years of finance, investment, and business development experience
• Founding partner of Wellington West Capital Markets, led technology and clean technology research and then investment banking efforts

Joe MacKay, Chief Financial Officer
• 25+ years of finance, investment, and research experience, targeted mainly at the technology, telecommunications and media sectors
• Chartered Professional Accountant with experience in audit, accounting and management consulting. Also Chartered Financial Analyst
• Capital markets experience included working as a equity research analyst at Scotia Capital, Desjardins Securities and Clarus Securities.

Jeff Bartkowski, Director of Business Development
• 12 years experience in the marine technology industry specializing in imaging, navigation, and positioning
• Worked at both larger marine technology companies such as Teledyne-RESON and iXBlue and start-ups such as Sea Machines Robotics

David Shea, VP Engineering
• Designed, built & operated AUVs for International Submarine Engineering, University of Southern Mississippi & University of Victoria
• Formerly Engineering Manager for Marine Robotics Inc. (Marport spin off)

Dr. Jakob Schwender, MD for Kraken Germany
• 10 years at DFKI, (the German Research Center for Artificial Intelligence) as an expert in autonomy, systems and software engineering for robotics, mission management, SLAM navigation, embedded systems, sensor processing and sensor fusion.
• PhD in Robot Navigation; led multi-disciplinary teams on autonomy in both space and underwater robotics.

Dr. Jeremy Dillon, Chief Scientist
• 20 years in R&D with a strong background in signal processing and mathematics. Previously a control systems engineer at Honeywell Aerospace, a flight test engineer at the NRC Flight Research Laboratory, and a research officer in guidance, navigation, and control at NRC.
• PhD in Physics and Physical Oceanography from Memorial University of Newfoundland, a MSc in Mathematics from Carleton University, a MSc in Aeronautics from Caltech, and a BEng in Aerospace Engineering from Carleton University.
Board of Directors

Karl Kenny, President & CEO

Vice Admiral Mike Connor, Board of Directors
- CEO of ThayerMahan and Former commander of U.S. submarine force from September 2012 until September 2015.
- 35 year US Navy veteran

Moya Cahill
- CEO and co-founder of PanGeo Subsea, a technology and service provider of high-resolution 3D sub-bottom acoustic imaging technology
- 25+ years in oil and gas sector and recently the renewable energy sector

Shaun McEwan
- CFO of Quaterhill Inc, Former CFO of WiLan, CFO Breconridge, CEO Calian Technologies
- 25+ years of technology & manufacturing industry expertise

Larry Puddister
- Executive Chairman of Pennecon Ltd, Atlantic Canada’s largest construction firm
