## Project Manager - Software

Based at Kraken Robotics (Mount Pearl, NL Canada)  
Full-Time – Permanent | Job Reference: KRSI-2024-30

### ROLES AND RESPONSIBILITIES

As Project Manager – Software, you will report to the Head of the Software Management Office to deliver software priorities as outlined by business stakeholders and client specific requirements, within a set timeline and budget. This role will work in an Agile-Scrum software development environment while using project management tools and resources as set out by the Project Management Office. The location is in our office in Mount Pearl, NL, Canada.

### KEY RESPONSIBILITIES:

- Develop and execute plans for software projects, including their scope, resources, and deadlines using project estimation techniques.
- Set and track project milestones, deliverables, and change requests to ensure successful delivery of software projects.
- Contribute to the software project roadmap in conjunction with the Head of the Software Management Office.
- Manage sprint planning sessions and prioritize the software backlog with the team's Scrum Master/Product Owner and/or Lead Software Developer.
- Provide regular progress updates to the Head of the Software Management Office.
- Support external software contracts and partnerships.
- Help organize the testing and evaluation of software products in various stages of completion.
- Ensure lessons learned on projects are captured and appropriate actions taken.
- Travel is expected.

### QUALIFICATIONS AND EXPERIENCE

- A minimum of four years' experience managing projects
- Project Management Certification or Project Management Professional Certification.
- A bachelor's degree in software engineering, computer science, or a related field.
- Strong English communication skills, both written and oral, to foster constructive and effective interactions.
- Self-driven, strong leadership, decision-making, organization skills, and excellent attention to detail for working on multiple projects alongside all of Kraken's global offices
- Flexibility, team spirit, and willingness to take responsibility
- Proficient in Office 365, including Teams and SharePoint

- Any of the following would be considered an asset:
  - Experience with large-scale software development.
  - Knowledge of UI/UX design.
  - Familiarity with electrical and mechanical engineering concepts.
  - Agile Scrum methodologies
