Software Quality Assurance

Based at Kraken Robotics Newfoundland or Nova Scotia, Canada location.
Full-Time – Permanent | Job Reference: KRSI-2024-40

ROLES AND RESPONSIBILITIES

Kraken is seeking a Software Quality Assurance professional to join our team. This position can be based at either our Mount Pearl, NL or Dartmouth, Nova Scotia, Canada location.

Key Responsibilities:

- Develop, maintain, and execute software and hardware-related test cases and test suites.
- Implement a plan and framework to automate existing manual test cases.
- Ensure that quality issues and defects are identified, documented, tracked and resolved.
- Become very familiar with the Kraken line of products, including both software and hardware components.
- Record QA results in an issue tracking system (Jira, Asana) and/or version control system (Subversion, Git), as appropriate.
- Validate Kraken product documentation.
- Work with various software teams in an Agile/Scrum environments to ensure the timely development and delivery of Kraken products.

QUALIFICATIONS AND EXPERIENCE

- A minimum of three years' experience in a software QA role.
- Ability to develop and execute exploratory tests, regression tests, and automated tests, to ensure product quality.
- Ability to develop test plans, test cases, automated scripts as well as traceability matrices.
- Knowledge of different scripting languages and coding best practices.
- Excellent written and oral communications skills.
- Strong ability and desire to learn and use new technologies.
- Ability to work independently, as well as effectively within a team environment.
- High degree of organization, incredible attention to detail, and the ability to prioritize tasks.
- A technical background.
- Experience with Agile/Scrum would be considered an asset.
